

# MAINTENANCE TRAINING COURSES

## FOR USERS OF BECK ELECTRONIC CONTROL DRIVES

Beck training courses are specifically designed to provide personal instruction for those personnel who are directly responsible for the installation, operation and maintenance of Beck products. A complete understanding of configuration, electrical and mechanical function, operation mode, calibration, and troubleshooting can give your staff an invaluable self-sufficiency. The thorough instruction and comprehensive training materials provided will enable your staff to properly calibrate and maintain Beck drives.

A basic course and an advanced course are offered depending on the needs of your facility and the type of Beck drives installed. These courses utilize the Beck Maintenance Training Videotape which is available for purchase.

### ADVANCED COURSE

For users of modulating models with analog position control, the Advanced Course covers the same items as in the Basic Course, with the addition of hands-on training as listed below.

#### Topics:

- System Interface (operation, calibration)
- Position sensing and feedback
- Electronics (troubleshooting to board level and component replacement)

### BASIC COURSE

For users of 2-position, multi-position, and modulating models with direct AC control, the Basic Course provides ample hands-on training on calibration and troubleshooting.

#### Topics:

- Unit operation (mechanical, electrical)
- Maintenance (mechanical, electrical)
- Linkage connection
- Troubleshooting

## Enrollment

### Basic Course:

Recommended maximum - 6 students.  
Course duration - approx. 4 hours.

### Advanced Course:

Recommended maximum - 6 students.  
Course duration - approx. 8 hours.

### Locations:

To save you considerable time and expense, Beck can arrange training courses at your plant, at a time most convenient for you and your personnel.

### To Register:

To make arrangements for a time and location, or to receive information on fees, call:
